PRODUCT DATA SHEET

E-Z ACCESS® Deck

Overview

The RELCO E-Z ACCESS® Deck is a customizable stainless-steel platform system designed to provide safe, efficient access to tanker trucks and processing areas. Engineered with flexibility in mind, each system is configured to meet specific facility layouts, clearance requirements, and operational needs.

Product Capabilities

- Provides safe, elevated access to truck manways and unloading areas
- Configurable to match site-specific layouts and bay requirements
- Enhances operator efficiency through ergonomic and intuitive design
- Designed for long-term durability in sanitary environments

Key Features

- Pneumatic lift system for smooth raising and lowering of drop deck
- Horizontal adjustment for precise alignment with manways
- Drop deck retracts to vertical position for truck clearance
- Slip-resistant walking surfaces (grating, grip strut, diamond plate)
- Corrosion-resistant stainless-steel construction
- Intuitive operator controls
- Self-draining, sanitary design

Advanced Components / Options

- Pneumatic or hydraulic lift systems
- Decking materials (ALGRIP®, Opti-Grip®, diamond plate)
- Indicator lights
- Low-profile configurations
- Custom layout and sizing

Utilities & Integration

- Pneumatic or hydraulic power supply
- Integration with plant layout
- Facility-specific configuration requirements
